## cy (code)\_sponsorship proposal

Dear Potential Sponsor,

'BangHack' is the beginning hackathon of our very first 

> Our first hackathon 'HackDelhi' last year was a huge success and we are really excited to be back with a bang. This September we are hosting the hackathon at Bangalore with 200+ coders and designers with a blend of students as well as professionals. It will be a 24 hour hackathon where the participants would work on interesting projects using latest technology.

## Why should you sponsor us?

The hackathon would have Computer Scientists and Engineers from all over India. You could allow participants to use your API, thus having your product being pivotal in the building of their project. This indeed is beneficial for both the company as well as the students.

By working with us, you could have your logo and swag put all across the venue, increasing your brand presence, on a national scale in not only universities across India, but other firms and companies as well. Moreover our website and pages in public forums would be having your details, thereby ensuring that the process is carried over the internet as well.

Lastly, when it comes to having talented minds required for recruitments, Cycode will ensure that your emails are circulated amongst all its members. This entitles you to have direct interactions with participants as well as observe them while they are working on their projects.

Contact Us: We want this to make an experience to remember and would love for you to be a part of it. All enquiries should be directed towards.
